USER MANUAL OF ISAQUIZ APP

Step 1:

As soon as we run the app the first page that you'll see is the login page. Which is then routed to four different pages depending upon our instructions. If you already have an account go ahead and login then depending upon your role which can either be student or admin you'll be led to different pages. And if you don't already have an account you can register yourself accordingly.
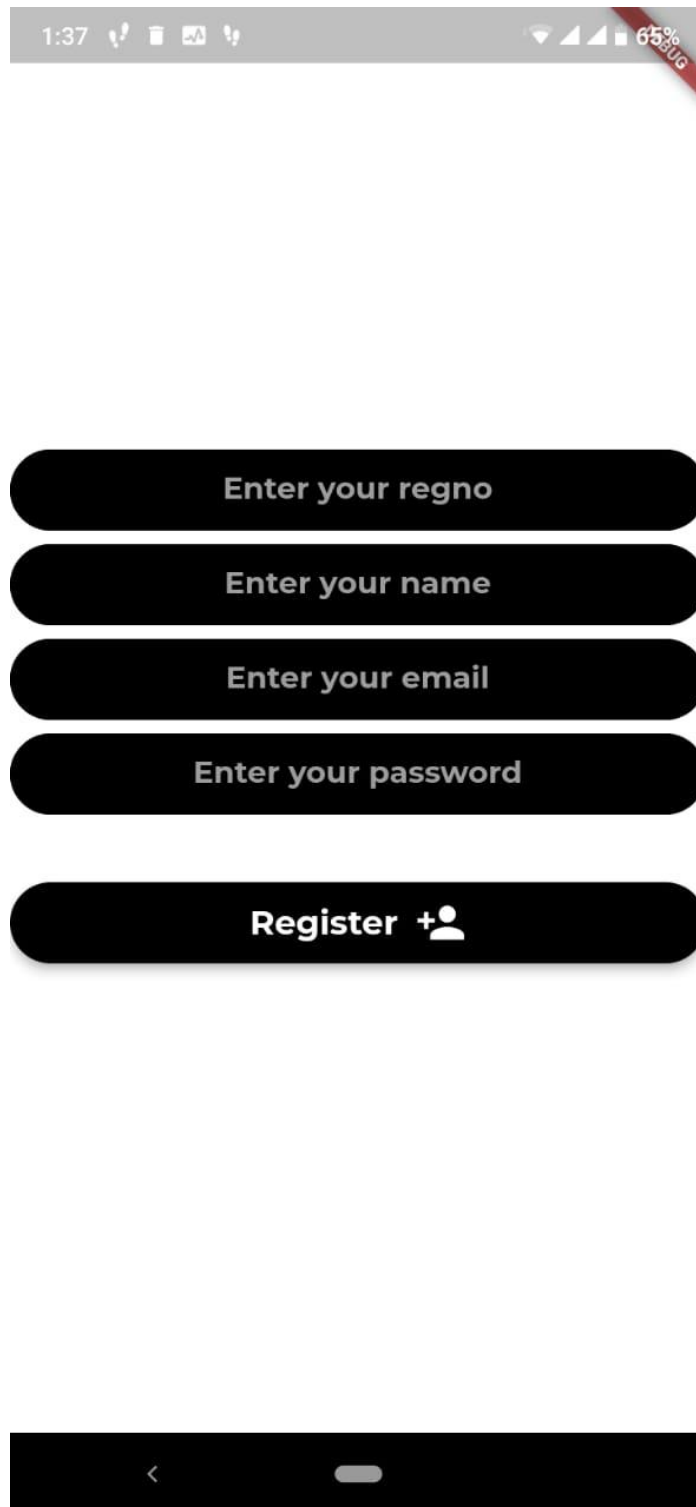

Step 2:

If you're registering as a student you'll be asked for the following credentials. After providing them, tap on the register button and you'll be good to go.
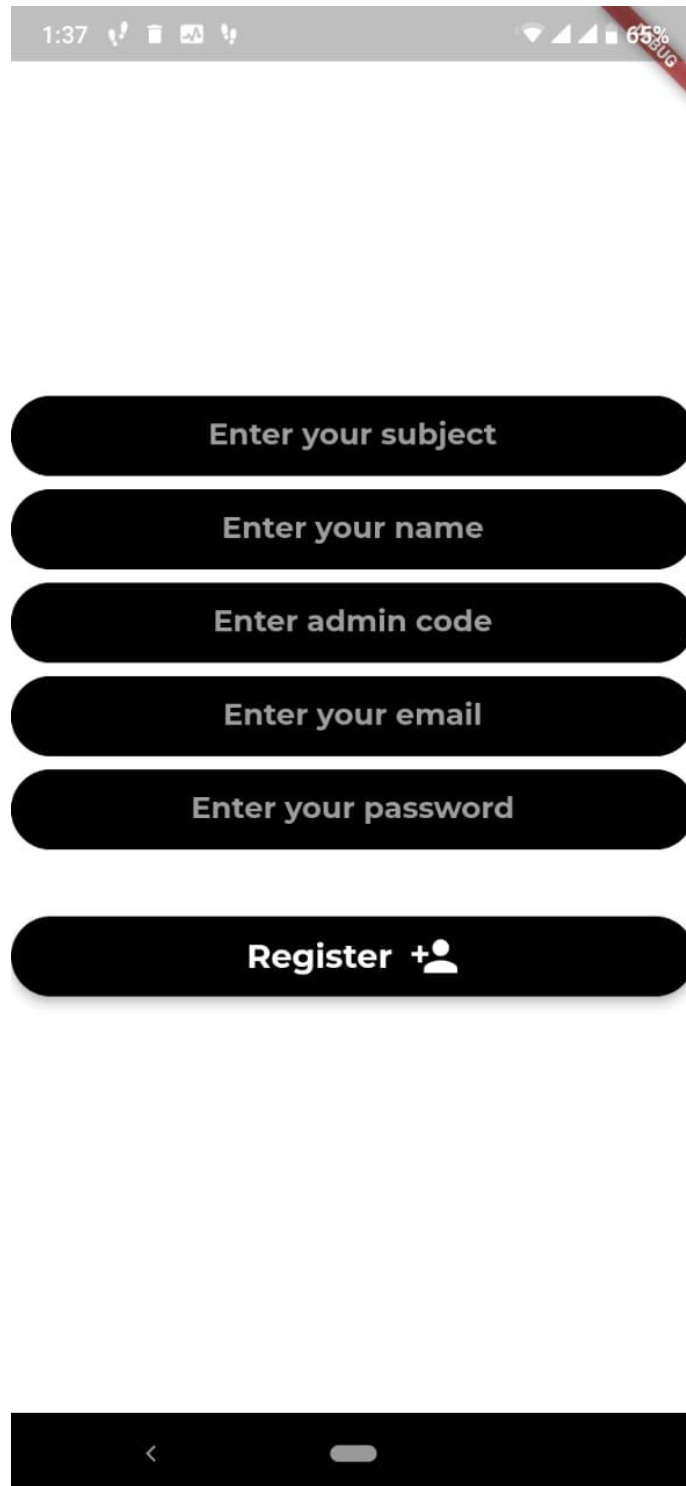

Enter your regno

Enter your name

Enter your email

Enter your password

Register +👤

If you're registering as an admin you'll be asked for following credentials along with a code to prevent students from logging in as admin for security purposes, this code will only be provided to teachers. After providing all the details you'll be registered as a teacher.

1:37

Enter your subject

Enter your name

Enter admin code

Enter your email

Enter your password

Register +

Step 3:

If you signed in as a teacher you'll see the following interface. Here, the teacher is provided with following services :

1. Create a quiz
2. Enable quiz
3. Review result
4. Logout

1. Create a quiz

From here the teacher can specify certain attributes necessary for the quiz like the starting date/time and of course questions and multiple choices to select from. After you enter a single question with answers of course, you can press the "+" button shown below, after tapping it your question will be store and the attributes other than date/time title etc will be cleared again so you can enter another question and after you're done entering all the questions you can tap the save button on the top corner where a dialog will pop to ask for confirmation to save and upload your quiz.
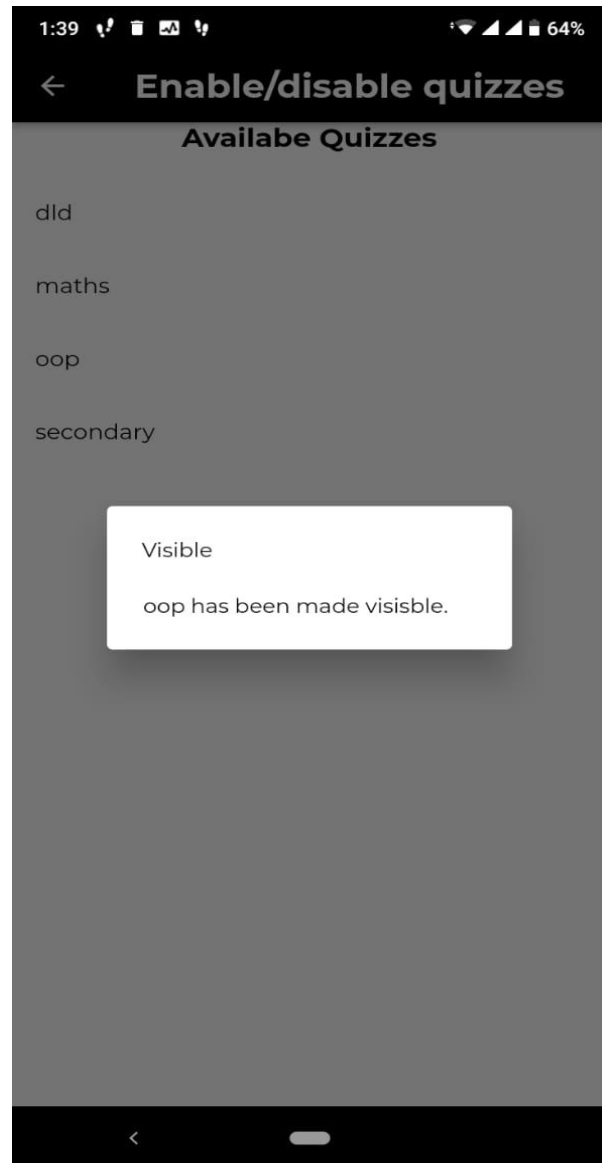

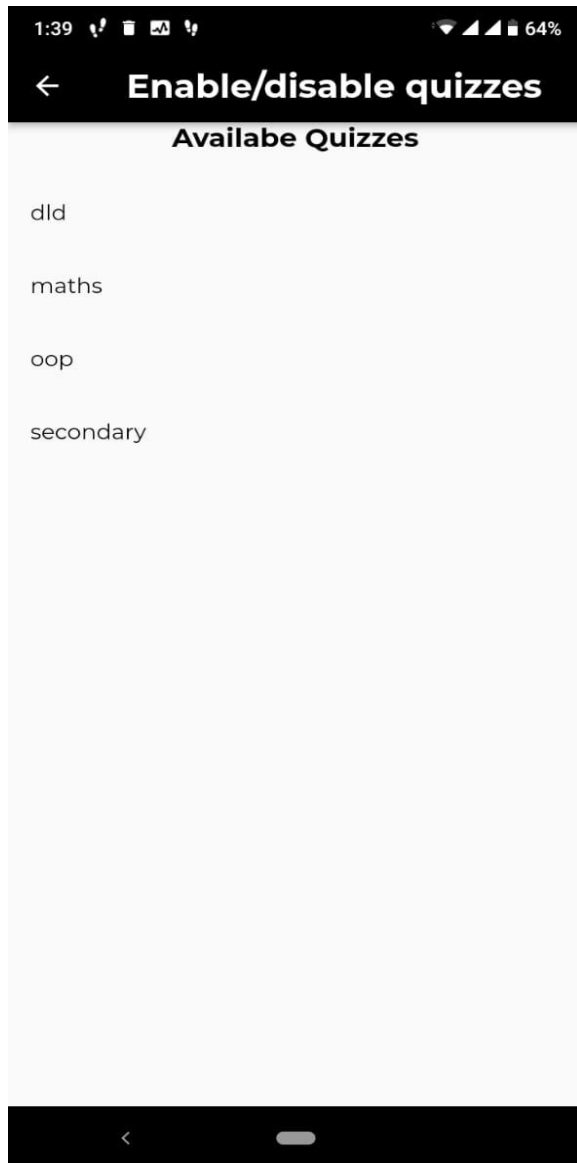

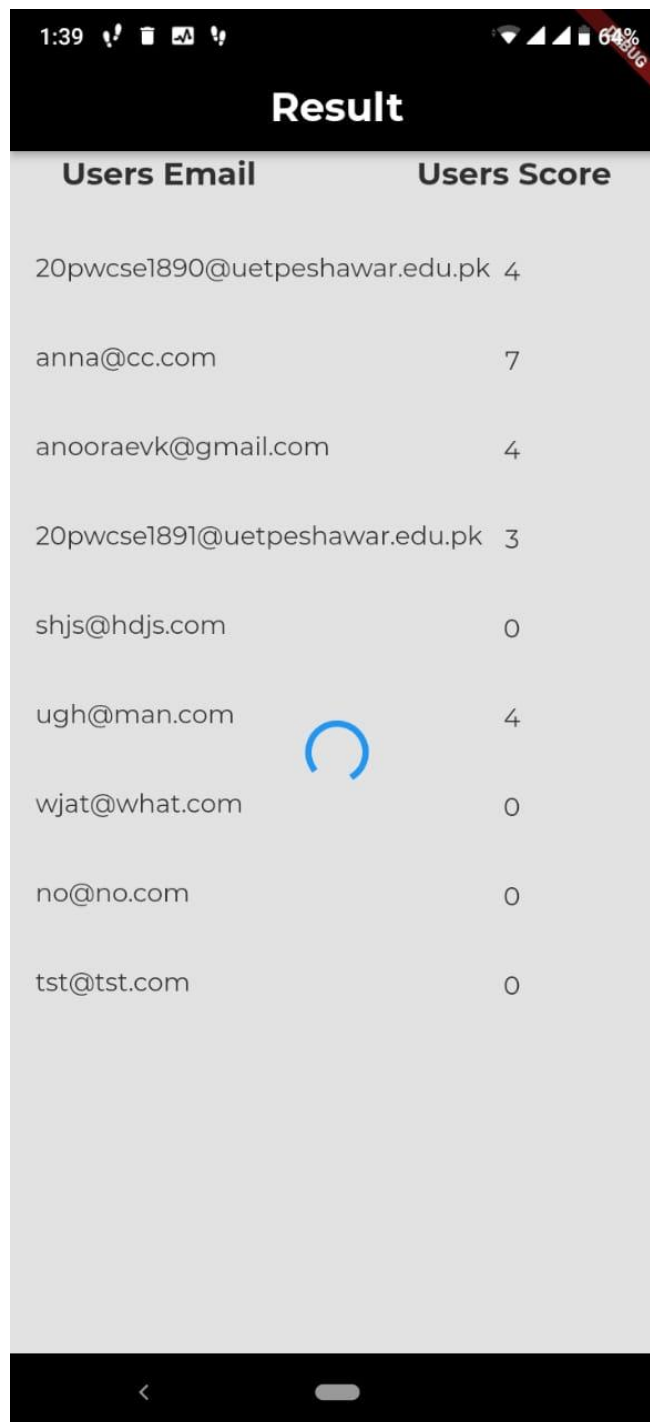

2. Enable quiz

If for example a teacher upload multiple quizzes he/she can disable or enable them according to their requirements. By enabling the quiz is made visible to the student and by disabling the quiz is made hidden. A preview of all available quizzes will be displayed and by tapping them they will be made visible if previously was hidden and vice versa.

3. Review result

Teacher can see the list of students who attempted the quiz along with their score.

4. Logout

The teacher can logout of the app.

Step 3:

If you signed in as a student you'll be provided with following view and following options:

1. Start quiz
2. Select quiz
3. View result
4. Logout

1. Start quiz
   If you haven't selected the quiz you want to take you'll see the first enabled quiz. You can select the correct option out of available answers and tap next to access the next question. You can see a timer at the top as soon as time's up the quiz will be disabled and submitted automatically if you haven't yet submitted.
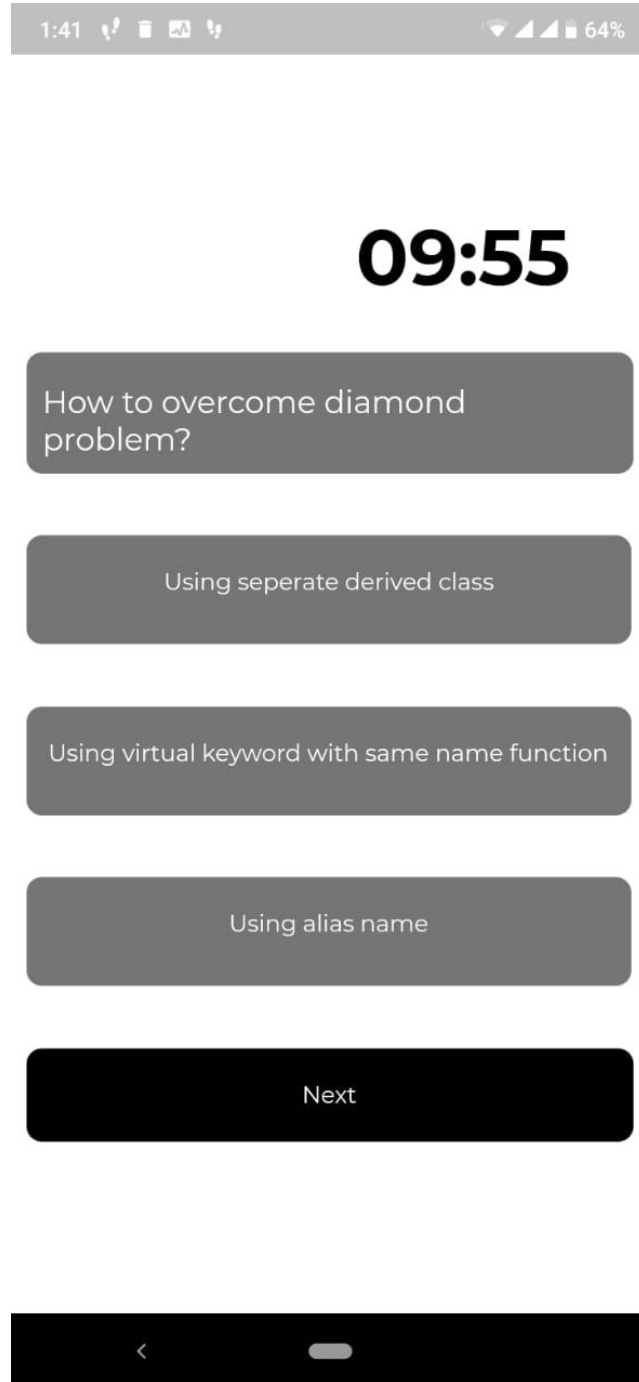

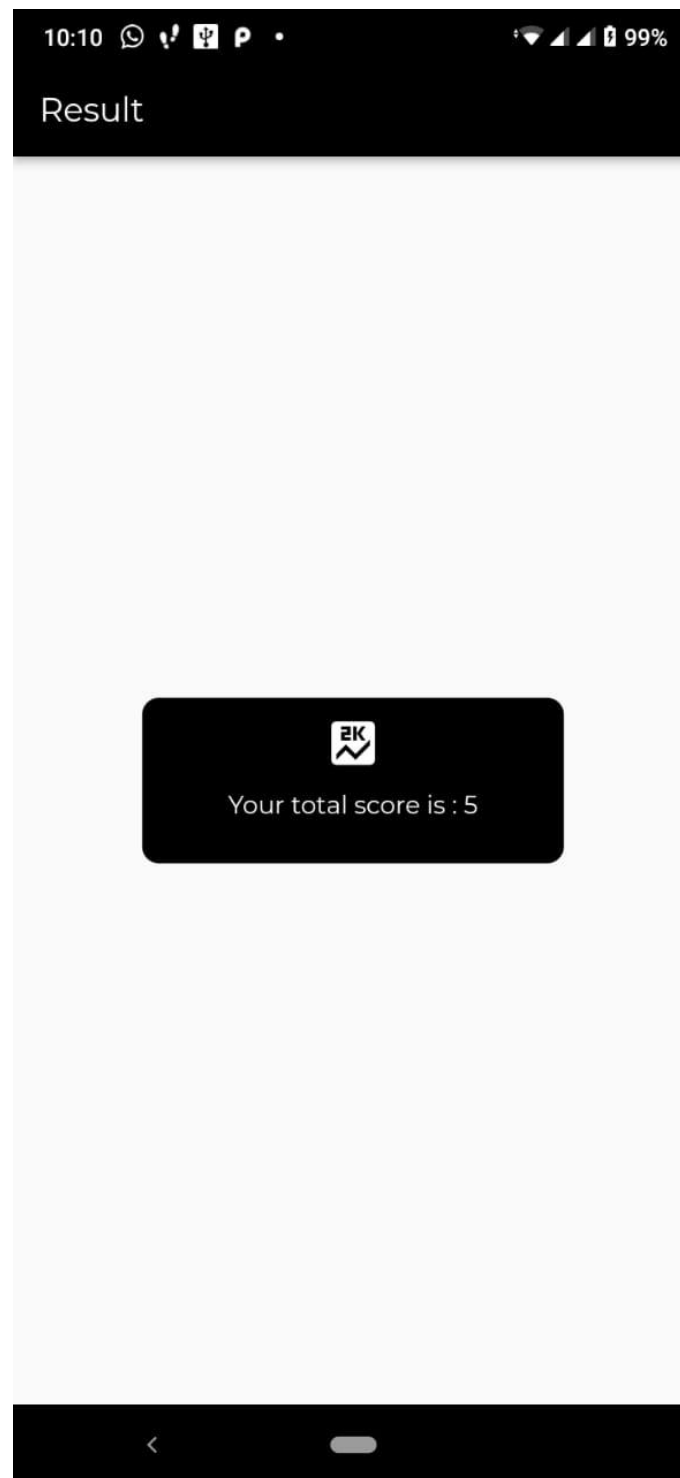

2. Select a quiz
   You can list of all available quizzes and select the one you want to take.
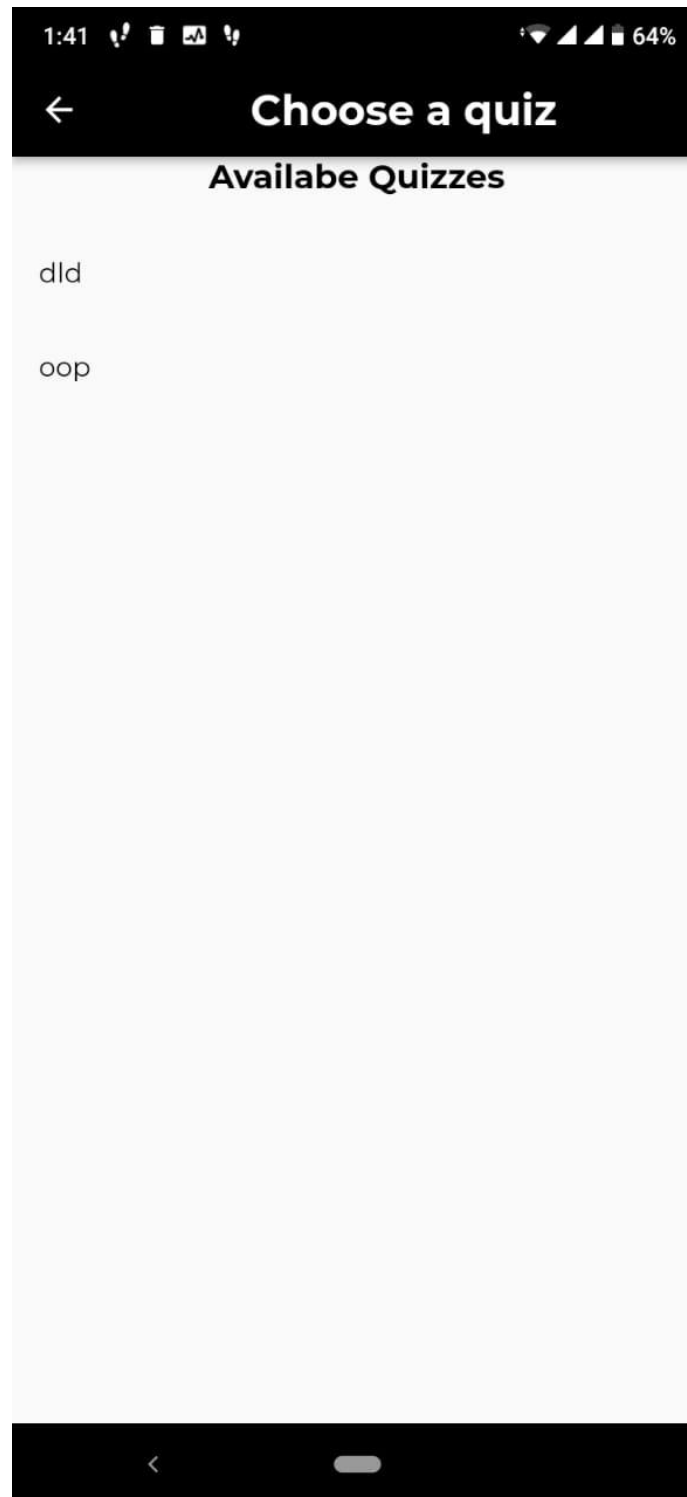

3. View result
You can see how you performed on the test.

4. Logout
You can sign out of the app.
